

## FIRE HOSE REEL PUMP SETS & JACKING PUMPS

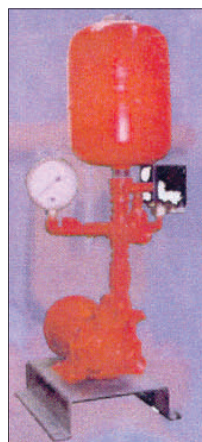

### **A RANGE OF FIRE HOSE REEL AND JACKING PUMPSETS ELECTRICALLY-DRIVEN AND SET FOR AUTOMATIC START/STOP:**

- Pre-assembled fire hose reel pumpsets, electrically driven and automatically started, comply with the performance requirements of AS2941
- Fire hose reel pumpsets arranged to prevent excessive cycling effects due to single hose reel operation
- Fire hose reel pump and motor close-coupled, and of the following types:
  - Regenerative Turbine pump
  - Centrifugal single or multistage pump
  - Jet-assisted centrifugal pump
- Automatic pressure maintenance pumps (Jacking, Jockey or make-up pumps) used when desirable to maintain a uniform, or relatively high pressure on fire protection system water mains
- Manually-operated jacking pumps generally used for boosting sprinkler installations

Pumps complete with pressure switch & pressure tank on a baseplate

Turbine pumps complete with pressure switch, gauge, cylinder & orifice on a baseplate

Pumps complete with pressure switch, check valves & orifice ball valve

#### **Options**

- Baseplate / Pressure cylinder
- Auto/Off/Manual switch / Counter
