

RobLaine

MECHANICAL SERVICES

ROB LAINE HAS A WIDE RANGE OF PUMPS FOR DOMESTIC & INDUSTRIAL APPLICATIONS:

Major supplier of packaged pump equipment to:

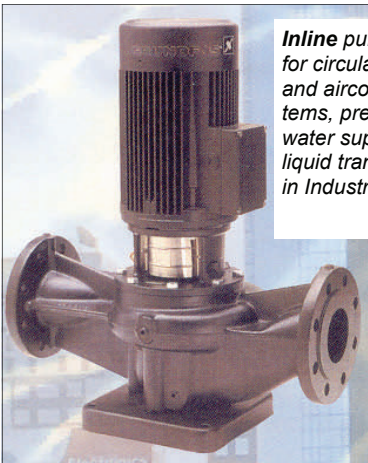

- General Industry
- Mining
- Wastewater and Treatment Plants
- Food & Beverage
- Wineries, Golf Courses, Nurseries

Pumps for:

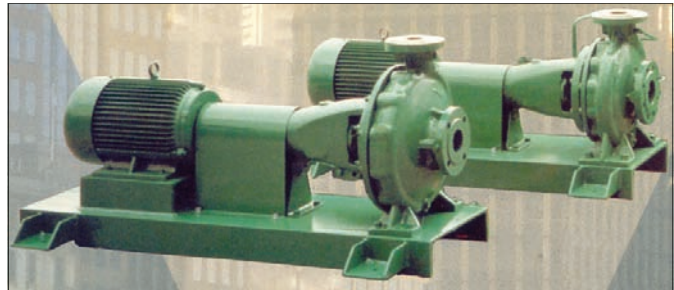

- Building / Mechanical services
- Refrigeration / Airconditioning
- Wastewater
- Stormwater removal
- Sewage
- Cooling Towers
- Domestic / Commercial

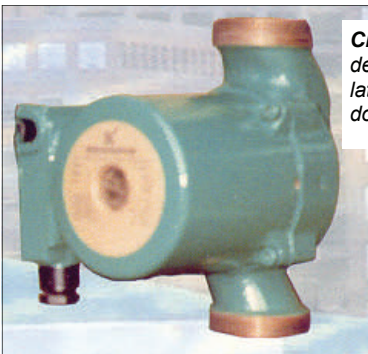

Water pressure systems are supplied with pressure tank and pressure switch, or a pressure controller.

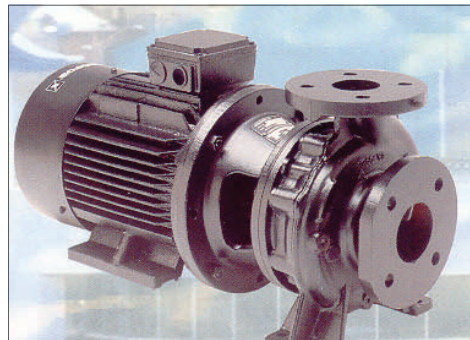

Inline pumps are designed for circulation in heating and airconditioning systems, pressure boosting in water supply systems and liquid transfer applications in Industry and Agriculture.

Long-coupled pumps offer the possibility of powering the pump with either diesel engine or electric motor. Traditional applications are mechanical services, irrigation, water transfer, fire fighting and boosting in general industry. Options: Mechanical seal, external seal flushing, packed gland, spring mounts, inertia bases and galvanised baseplates.

Circulator pumps are designed for the circulation of instantaneous domestic hot water

Close-coupled pumps eliminate costly couplings and alignment problems that occur with long-coupled pumps. Designed for water supply, boosting and industry. Options: Mechanical seal, external seal flushing, spring mounts.
